

## DESTROYER WRECK LAID TO ERROR IN JUDGMENT

**Commander of Delphy Also Blames Uncharted Current for Honda Bay Catastrophe**

BY CHARLES SLOAN

SAN DIEGO, Sept. 25.—Destroyer Squadron No. 11 was wrecked upon the rocks of Pedernales Point and twenty-three lives were lost through "an error of judgment affected by contributory causes, these being a northerly current unknowingly encountered and the fact that the Point Arguello radio compass station was so equipped as to give misleading bearings."

This today was the opinion of Lieutenant-Commander Donald P. Hunter, commanding officer of the Delphy, squadron leader. It was given in answer to a direct inquiry by Rear-Admiral William F. Pratt, who is not, however, responsible for the accident. After made by Capt. Edward H. Watson, who voluntarily assumed all responsibility for the disaster, that court-martial of certain other officers will result from the findings of the board.

**STORY HAS BEEN TOLD**

After a week and two days of questioning of witnesses, it is concluded that the first question that happened to the squadron, as near as it can be related, has been told. Among the witnesses have been the squadron commander, the executive officer, the gunnery officer, the captain and the Navigator of the ship. The radio operators who set the bearings which either were normal or were disturbed in locating the position of the squadron have been questioned and cross-questioned. And, from now on, it is believed, all testimony received will furnish corroborative of one phase of the story.

A summary of the testimony brings out the following facts: (1)—The speed of twenty knots was the order given by Capt. Watson on instructions from Rear-Admiral E. W. Kittle, to thoroughly test the cruising turbines. (2)—The visibility was good and no fog was encountered until within a few yards of the point where the Delphy struck; that the fog hung over the land but kept away from sea.

**BEARINGS RECEIVED**

(3.) Radio compass bearings were received all during the afternoon and evening from the Point Arguello station and late as 6:15 o'clock were received at the ship's position above.

From out of the darkness came apparently disengaged and dead reckoning based on propeller revolution substituted. The dead reckonings showed the vessel in Pedernales Roads off Santa Barbara and, the radio compass bearing late, showed them just north of Point Arguello and abreast of the point of Pedernales Point.

(4.) Three bearings were taken by Lieut. Lawrence H. Blodgett and by Lieutenant-Commander Hunter, who advised Capt. Watson of the situation and who later assisted him in re-checking the bearings.

(5.) Capt. Watson, after so re-checking, ordered a change of course at 9 p.m. nearly at right angles shoreward, despite the fact that two minutes earlier radio compass bearing had been received showing him still north of Point Arguello.

(6.) The ships crashed at Pedernales Point, proving conclusively

## GERMAN REDS STIR REVOLTS

**Socialists Urged to Seize Government**

**Party Ultimatum on Eve of Surrender**

**French Adopt Policy of Watchful Waiting**

(Continued from First Page)

German directors of mines and factories have taken no decision regarding the resumption of work. It is generally believed they are awaiting definite orders from Berlin. The Ruhr workers are awaiting developments and are uncertain what Ruhr relief no longer will be forthcoming.

French officials tonight drew an analogy between the present condition of the workers and the shift for the miners and the great majority of soldiers suddenly demobilized in 1918. And as a result of that breaking twenty-three lives were lost under conditions most appalling.

(8.) This loss of life would have been much greater had it not been for the high morale of the enlisted men and the conduct of their officers after the crash.

(9.) Capt. Watson, the squadron commander, has publicly renounced himself willing to "assume all the responsibility which is his," and avers that he is technically guilty, at least, of any errors which the court may find have occurred in the conduct of the squadron as a whole. Lieut. Blodgett, the navigating officer of the Delphy, stated that the wreck occurred because the radio bearings were disengaged.

Should serious disturbances of any sort arise in the rest of Germany, it is thought they would most certainly have the effect of inciting the members of the Rhine corps to arms. It is the responsibility of the legislative body.

The Allied troops, it is asserted in official circles will not be allowed to remain in Germany, but they will be compelled to return to their country, as the absence of other military force responsibility rests upon them for the maintenance of order in the occupied territory.

"In Oklahoma City seventy-four National Guardsmen have kept a city of more than 100,000 under absolute martial law. In Tulsa fifty-nine guardsmen have held another city of 100,000 under absolute martial law for 125 days. Uniforms in two counties of the State complete the roll on active service with which Gov. Walton has held the State up to public view as a criminal and an outlaw. The people have no objection to this, but the Allies are not disturbed.

In the event of cessation of passive resistance is not attended by violent outbreaks, the Allies will, it is assumed here, be faced at once with the necessity of providing for a new regime of occupation.

The hypothesis is that the industrial leaders of the Ruhr, freed from the anti-Semitic policies of the Berlin government, will repeat the pronouncements made by the German economic experts to pay the cost demanded by the compensation authorities and to co-operate with them.

It is anticipated that the German government, pending final settlement of the new terms for the payment of reparations will ask that the captured functionaries be allowed to return to the Ruhr, the imprisoned industrial magnates included. Dr. Krupp, Von Bohlen and Hatzfeldt, and that the rigors of the occupation be lessened.

**THOUSANDS VOLUNTEER**

OKLAHOMA CITY, Sept. 25.—Thirty-five thousand men in the State have volunteered for service in the Oklahoma National Guard during the legislative crisis, Gov. Walton announced here tonight.

The trial of N. C. Jewett, Grand Dragon of the Klan, was postponed today until October 9.

**RED'S MARCH TOWARD SOFIA**

(Continued from First Page)

Bulgarian War Department through Premier Zaitsov.

To meet the danger which the situation holds, King Boris has signed a decree of martial law, which is ready for instant promulgation in case of necessity. This decree is required to enable the prompt suppression of the Communist plot declared to be under the leadership of Vassil Kolaroff, the secretary of the Bulgarian Comintern, Mihail George Demiroff and Tudor Lukashoff.

**SEIZE PLOT PAPERS**

Documents seized from leaders of the uprising in Sofia show the command was intrusted to these three and two others, reserve officers.

The decree will raise Sofia to regular status and give it the entire country by military means.

The plan of the Communists was to cripple their opponents by seizing the telegraph and telephone offices in Sofia, which they held up to last night. A complete duplicate equipment, however, was established in the Hotel Macedonia.

Units were placed at the railway stations around the capital communications office and the night passed without incident at these points, although an attack was expected.

The Financial Governor of Philippopolis reported to the Minister of the Interior today that four of the columns organized in his district had capitulated, with three remaining to be taken in the Panagia district.

A sentry was found killed yesterday at Plevena and a peasant's bag near the spot was taken to indicate that the assassin was an anarchist.

Many excesses such as those which characterized the early phase of the Russian Bolshevik revolution are reported from various districts both north and south of Bulgaria. At Ratchitsa the military suppressed a local soviet republic. There was a similar suppression of one in Duvandjilar, near Plevena. In Northern Bulgaria order was reported to have been restored.

Sofia was closely guarded by infantry and cavalry last night. Cities were frequently challenged by the sentries.

**TO KEEP GUNBOAT AS SPANISH WAR RELIC**

(Continued from First Page)

WASHINGTON, Sept. 25.—The higher duties of the Fordney-McCumber tariff law combined with increases in imports to boost customs receipts more than two hundred million dollars in the first year of its operation over receipts in the last twelve months. The Underwood tariff was in operation.

Figures compiled today at the Treasury showed total income from customs levies for the twelve months ending the 22nd instant to have been \$164,541,421.

The duties under the Underwood law for the year ending September 30, 1922, produced slightly less than \$160,000,000.

## WALTON ASKS FEDERAL HELP

**Proposes Federal Commission With Broad Powers**

**Secretary Opposes Fixing of Price by Government**

**Report Asks Cut in Freight on Farm Products**

(Continued from First Page)

tionsing calm, yet urging the legislature to be firm and try to meet.

There was no movement of soldiers reported today, no actual mobilization of new forces. The situation is quiet, though no one is safe indeed; it is a one-sided war.

The Ku Klux Klan is silent. The State fair is going on. The Rotary Club is meeting and singing the "Battle Hymn of the Republic" on the floor below.

Women's clubs are meeting.

Some of the women wives of legislators, may march to the Capitol tomorrow in protest against the Governor's action. No news of an armistice, no news of truce. He is behind the Governor's remarkable order of last night.

The situation would be grotesque if it were not so serious and potentially dangerous.

The play boy stars of the western world are playing their part.

"We want neither king nor Klan," is probably the most popular slogan of the day.

In causticating the people to keep calm, the Oklahoma News says to day:

"Gov. Walton's 'shoot to kill' order is one of the most remarkable documents ever promulgated by a public official.

And the League met tonight and received the report of the experts who were appointed to frame suitable questions on which the covenant could be judged, the idea being to submit them to the permanent commission of international experts to secure illuminating rulings which will serve as a basis for the future.

**SHIPPING RATE CUT**

As a part of the effort to stimulate exports of wheat Secretary Wallace declared that there should be a reduction of at least 25 percent in freight rates, especially of the surplus grain.

Gov. Wallace also said that the surplus grain and feed should be sold temporarily at a lower price.

He also said that the surplus grain and feed should be sold temporarily at a lower price.

## SILLIE HUNTER ANNEXES LOW GROSS TROPHY IN STATE GOLF TOURNEY

### SOUTHERN STAR LEADS FIELD BY TWO STROKES

**Local Club Player Brings Total 144 in Qualifying Round on Del Monte Course**

BY CHARLES WEST  
"Times" Staff Correspondent  
(EXCLUSIVE DISPATCH)

MONTE, Sept. 25.—Continuing his splendid golf in half of the qualifying round for the State amateur title, Willie L. Hunter of the Rancho Country Club, here, gave trophy today, leading the balance of a brilliant by two strokes. A 72 on the Pebblebeach course and another on the Del Monte links today brought his thirty-six holes to 144.

Pebble Pacific North followed the former John McHugh of San Francisco, who had a score of 145 for his nine holes of Wilheim's total, taking third place. George Seaver scored 150, while State Champion Fred Scott Edwards each a 152.

**QUALIFYING ROUND**  
yesterday kept his total also rather high. Harlow Hurley, newcomer from Southern California, who plays at Annandale, duplicated his seventy-nine yesterday on the Del Monte links today, being sure to qualify for the final round. Hurley, while Everett Seaver's 162 will probably just squeeze him in. George Ritchie, champion of Northern California, also scored

a 152.

**NO DARK HORSES**  
No dark horses qualified for the championship flight, all low handicap golfers having held to themselves. Stars from the Pacific Northwest, Southern California and Northern California made the grade, and match play for the premier gold honors of the State began yesterday.

Score on 156 and under, and two 167s qualified for the championship flight. As a result of the draw for match play Hunter meets C. E. Foley in the first round and the other elimination without particular trouble. Hunter is in the lower half of the draw with Jack Neville, Harlow Hurley, Everett Seaver and Johnny McHugh, while Rudy Wilheim, Fred Wright, George Ritchie, Bill Campbell and Scott Edwards are the stars in the lower half.

**IMPORTANT MATCHES**  
Two matches of importance are on tomorrow's schedule. Everett Seaver and Johnny McHugh meet in a north-vs-south match in the upper bracket, while George Ritchie and Scotty Armstrong stage another north-vs-south battle in the lower half of the draw. McHugh and Armstrong are the favorites, but by such a slight margin that their defeat would not be such a surprise.

The rest of the matches in the lower bracket will be decided after the arrival of the fixtures already set as practically invincible.

Mrs. Mary Browne, defending women's Del Monte champion, arrived yesterday from San Diego from the south. Miss Dorcas Karch and Miss Margaret Cameron have not arrived, but their entries will be accepted in case they arrive in time to qualify. Eighty feminine golfers will tee off in the eighteen-hole medal round tomorrow.

Pairings in the championship flight follow:

Willie Hunter vs. C. E. Foley.

(Continued on Second Page)

### HELEN VERNON, AMBASSADOR CLUB SPRINT STAR

### WATERFEST TONIGHT IN LOCAL POOL

Duke Kahanamoku Tops List of Swim Stars Entered in Ambassador Meet

Several Pacific Coast records are likely to fall tonight when practically all of Southern California's aquatic stars gather at the Ambassador plunge for competition in various events arranged by Coach Frank Holborow. The meet, staged under the auspices of the Ambassador Swimming Club, will be one of the final outdoor affairs of the season, and promises to draw a big crowd. The festivities are slated to get under way at 7 o'clock.

A series of 75-yard events arranged by Frank Holborow have drawn many stars and at least one or two records are sure to fall. The first, a 75-yard free style race, will be won by such brilliant sprint stars as Duke Kahanamoku, Buddie Smith and Reggie Harrison entered, should prove one of the best races ever staged in a local pool. Though Kahanamoku is expected to cop the top honor, Eddie Harrison, who pressed him in both the 50 and the 100 at Lake Arrowhead, may beat the Hawaiian star.

Other 75-yard events scheduled include a breast-stroke for men, breast-stroke for women, a free-style for women and a back-stroke for women. Charles Fletcher of the Sunset Swimming Club, San Diego, should easily take the breast-stroke in which Alvin May Howard and Ella Buss, also of San Diego, are favored to cop this event for women. Helen Vernon, Olive Hatch and Mary Wheeler will fight it out for first place in the free-style.

The rest of the matches in the lower bracket will be decided after the arrival of the fixtures already set as practically invincible.

Mrs. Mary Browne, defending women's Del Monte champion, arrived yesterday from San Diego from the south. Miss Dorcas Karch and Miss Margaret Cameron have not arrived, but their entries will be accepted in case they arrive in time to qualify. Eighty feminine golfers will tee off in the eighteen-hole medal round tomorrow.

Pairings in the championship flight follow:

Willie Hunter vs. C. E. Foley.

(Continued on Second Page)

Grant Swan, holder of the Southern California interscholastic record in basketball and former captain of the former University of Utah grid, has been signed to assist "Rabbit" Mallett with the coaching at Lincoln High School. Tommy Davis' operation has a new coach, and, according to him, a while, and Mallett, loaded up with work, found it necessary to call for assistance. The appointment of the two new mentors will greatly enhance Lincoln's athletic status this year. Van Pelt starred at center for the Los Angeles Athletic Club basketball team last winter.

Ineligible rulings have hit on Grant Swan this year. Already found guilty of the same offense, the Ballsmitters have been ruled out. Immediately after the opening of school Case, last year's center, and Hasseman, a tackle, who started with the team last season, were declared ineligible. Yesterday Cromwell and Chandler, important cogs in Mallett's tentative backfield, were ruled out.

**SUNDAY SHOOT AT VERNON GUN CLUB**

The Vernon Gun Club will hold another of its famous take-home contests this Sunday morning, it was learned yesterday, from Bill Pugh, secretary of the Vernon organization.

It will afford local hunters a final practice for ducks, the season on the quick-shucks opening the following day. Sunday's shoot will be at 100 targets from sixteen yards with a fifty-target-distance handicap event to follow.

### NEVADA SAILORS TRIUMPH

**U.S.S. Oklahoma Football Warriors Beaten in First Game of Season by 6 to 0**

Football was broken out in the Southland yesterday at Trona Field, Los Angeles Harbor, by the newly concocted eleven from the U.S.S. Nevada and U.S.S. Oklahoma, the Nevada winning 6 to 0. The game was exceptionally well played for an opening struggle and filled with mid-season thrills.

Jimmy Boyne the Nevada's slippery half, made the only touchdown of the game in the first quarter, with the ball being passed to him. He bucked through the Oklahoma's line on the last down after Ghiselin had advanced the ball to the 20-yard line in a spectacular run from midfield.

Both squads had the ball within striking distance of the goal on several occasions during the early quarters, but lacked the scoring touch. Early in the Nevada's defense, captain and last year's backfield star of the Army-Navy game, led his team's offensive with some clever broken-field running. He also put on an opposing ball-carrier with remarkable speed.

The only forward passes of the game were credited to the Okla-

homa being short shots from Jack Neville to Ruby and Chenevay. Nevada and displayed the best straight football of the game, sharing team honors with Ghiselin with.

### VARSITY MEETS FROSH FRIDAY

Two New End Men Candidates for Position

Supply of Linemen Appears Quite Favorable

Backfield Outstanding Hope of Coach Nixon

EXCLUSIVE DISPATCH  
CLAREMONT, O.—Long grass on Alumni Field here is being worn low as Coach Nixon's gridiron gang are being put through strenuous signal practice in preparation for their first tilt, that with U.S.C. in the Los Angeles Coliseum October 6, less than two weeks away.

Scrimmage is expected to start either Thursday or Friday with a clash between the varsity and the frosh, who are turning out to practice in unison and under the direction of Coaches Hod Chambers and Brainerd Dyer, are showing up well.

What appeared to be a sad dearth of ends is turning into a goodly supply as two new aspirants for the wing job are behaving creditably in practice, as well as some second-string candidates from last year. Jack Cowan, of Claremont, who has a son in Junior college to his credit, is carrying his 160 pounds around with such gratifying speed that Coach Nixon has shifted him in practice, from his regular job at tackle, to end. Bob Maxwell, the second only to Charley Dagger, is the other little surprise for the Pennymon men in rounding up his supply of ends. Bill Stanford and Rud Praetz have so far been the most frequently used on the wings in the signal practice. Dramer and Worden are also likely men for end jobs whom Coach Nixon is figuring on.

Supply of linemen is also appearing in a more favorable light with the addition of Otto Vernon, 180-pounder, who has been shifted to tackle from end, and the arrival of Bert Nelson, Griffith tackle from frosh last year. Leslie Baynham who is quick on his feet despite 190 pounds is considered certain for a tackle job. James Carter, substitute last year, will likely land

### FAVORITES GATHER SAUCE

First Choices Corral Plums at Columbus Meeting; Murphy Pilots Two Winners

(By A. P. NIGHT WIRE)

COLUMBUS (O.) Sept. 25.—Favorites had a big afternoon in the Grand Circuit races here today. First choice won every one of the fifteen heats raced with a single exception, that being Cupid Albington's victory in the second heat of the Buckeye Stake.

Mary Ann, first choice in the 2:12 trot was a straight heat winner, but driven by Thomas Murphy, she established a new record for the Buckeye \$2000 trot for 2:12 trotters by going the first heat in 2:02 1/4. Summaries:

Race	Horse	Driver	Time
1	First Choice	Tom Murphy	2:02 1/4
2	Cupid Albington	Tom Murphy	2:02 1/4
3	John Henry	Tom Murphy	2:02 1/4
4	War Bride	Tom Murphy	2:02 1/4
5	Little Queenie	Tom Murphy	2:02 1/4
6	Dale Finch	Tom Murphy	2:02 1/4
7	Lady Toot	Tom Murphy	2:02 1/4
8	2:12 Trot	Tom Murphy	2:02 1/4
9	Miss Mary	Tom Murphy	2:02 1/4
10	Little Queenie	Tom Murphy	2:02 1/4
11	War Bride	Tom Murphy	2:02 1/4
12	John Henry	Tom Murphy	2:02 1/4
13	War Bride	Tom Murphy	2:02 1/4
14	John Henry	Tom Murphy	2:02 1/4
15	Miss Mary	Tom Murphy	2:02 1/4

One of the guards, while Hart Thompson and Alfred Tarr, both new in football here, and each weighing over 200 pounds, were to be cut. Captain H. Moore can hardly be displaced from center, as the doctor has approved the condition of his leg, and more especially as he seems to have lost none of his strength since as result of the accident last spring in which the leg was broken.

Backfield prospects still remain the outstanding hope of Nixon. Edward McCullly, 172 pounds, at full speed, is the best back half, with Charlie Clark half, with Earl Merritt quarter should outclass considerably the powerful backfield which Glen Doughty and Ray Wilson led last year.

Harry Colf is Prize Winner on Pin Alleys

The all-day bowling tourney held at the Pekomane Alleys last Sunday resulted in some excellent scores. About two hundred of the best bowlers in Southern California participated. The high honors went to Eddie Roberts, the famous cigar-fame, who carried off the first prize with a score of 254. He also carried off the special prize for high series in any event, shooting 442 in the double. Herman Levey, of Pasadena, won the all-event with a score of 1747. The Pekomane owner presented each lady present with a hand-painted bon-bon chinis dish.

WILL BE ON JOB	
That the bowling season is to be ushered in full swing was indicated yesterday, when it was announced by E. H. Cleggner, manager of the Angelus Academy that the third annual all-day tournament of the Angelus would be put on next Sunday.	
The play will consist of five-man teams, each double round-robin. It is expected that about twenty-four teams in and around Los Angeles will take an active part in the play. The first squad will take the alleys at 1 o'clock, playing the five-man team competition.	
LOOKING FOR GAMES	
Santa Barbara High School is looking for football games with any high school in or near Los Angeles for this Saturday and also for October 13 and 20. Managers of teams caring to meet Santa Barbara should get in touch at once with the athletic manager of that high school.	

Opportunities to Enter Business

Many a manufacturing concern which today occupies modest quarters on a side street is destined to take its place among the important industries of Southern California. To effect this change, more capital may be needed, or possibly a partner to share responsibilities, or perhaps a complete new management.

Many a little retail store, struggling against the handicap of slothful methods, is ready to flourish and forge ahead—when the right new proprietor comes along.

Business Opportunities in Southern California were never before so plentiful, so varied, so quick to respond to well-directed efforts. In the majority of cases all that's needed is care, attention to detail, good service—things that any ordinary man or woman can supply.

The best of these opportunities are advertised daily in the want ad columns of the Los Angeles Times, the great business market place where business buyers congregate.

## MIDDLE WEST NEWS IN BRIEF

### EXCLUSIVE DISPATCH

KANSAS CITY, Sept. 25.—Angered because their victim had no money, one of two negro bandits attacked John Morris, 21 years of age, with a knife or razor cutting off his left ear and inflicting lacerations on his right arm and on the left side of his face.

There were forty-four accidental motor car deaths in Kansas City in the first eight months of this year. In the corresponding period of last year there were thirty-nine deaths.

### DES MOINES

DES MOINES, Sept. 25.—Work at present time is rather scarce in Des Moines for the typist, clerical worker and other lines followed by women according to the secretary of the employment department of the Y.W.C.A.

Fire of unknown origin destroyed the costly country home of Mrs. Elsie Eason, ten miles northeast of Marion. The original papers of Mr. Eason's purchased dogs were destroyed in the blaze.

John Andrelik, 35 years of age, wealthy farmer living near Cedar Rapids, blew out his brains last night by shooting revolver in his mouth. A horse fell on him last week and he had been unable to sleep since because of pain.

Friends of George M. Lyon, sporting goods dealer of Des Moines, who died yesterday, were told to learn that they had been made heirs to a fortune of \$50,000 to \$75,000 by his will, which was found in the safe yesterday. None of them thought that Lyon's wealth exceeded a few hundred dollars.

### OMAHA

OMAHA, Sept. 25.—Cool weather and threatened frost in the vicinity of Greeley is causing apprehension among farmers over the corn crop.

The 1750 ranch lands, totaling over 1400 acres, have been thrown open to farming. The big ranch, known from coast to coast, is to be cut down to 1000 acres, former owners and the like, and disposed of, it is announced by the present owners. With its breaking up and sale there will pass into history one of the most famous ranches in the State.

### ST. LOUIS

ST. LOUIS, Sept. 25.—Mrs. Stella Martin of 1554 Page Avenue, a Christian Science practitioner, was ordered held under \$5000 bond for alleged criminal trespass by a Coroner's jury yesterday in the case of Albert L. Blackford, 8 years old. Mrs. Martin had been called to give the lad Christian Science treatment. An autopsy by a Coroner's physician showed that he died of diphtheria.

The estate of James L. Hemp, managing-treasurer of Hemp & Co., who died July 28, is valued at \$284,412. As no will was left, the estate will be divided equally between the widow, Mrs. Susan E. Hemp, and four children.

Mrs. Z. C. Mason of Los Angeles, is visiting her brother-in-law and sister, Mr. and Mrs. G. R. Draughn, on Plymouth Avenue. Mrs. Mason is en route to her mother's, following a stay of four months in Europe.

Mrs. E. E. Cloud has closed her cottage in Michigan and is the guest of her sister, Mrs. Edgar Barnard, for a few days, en route

### INDIANAPOLIS

INDIANAPOLIS, Sept. 25.—Ella Harris, the original of countless stage Eliza who jumped from a cake to ice and to the gasping words of small boys in the saloon, has had a marker unveiled to her memory on the site of the old Hebrew log cabin at Babee, where she is said to have slept on her journey to Canada on the "underground railroad."

John A. Miller, who for a third of a century has camped each summer at an old swimming hole Flatrock River in Columbus, Ind., and in all these years has never been to the community as "Jack the Bum" and has saved the lives of many people from accidental drowning than the number of years he has come there, has departed for Illinois, where he spent his winter.

The Bank Ready Company has bought the building at 214-215 North Delaware street from Mrs. Laura Huey Johnson for \$125,000. It is announced.

### DETROIT

DETROIT, Sept. 25.—Despondency because of continued ill health is believed to have caused James G. Malier, 65 years of age, wealthy retired business man of Detroit, to take his life at his home there.

Detroit's building total for the first eight months of this year, \$16,883,200, shows a decline of 17 per cent from the corresponding period last year; the State total, \$164,452,000, shows a 10 per cent decline.

### LOUISVILLE

LOUISVILLE, Sept. 25.—The Republicans and Democratic parties will nominate full State tickets at the coming November election. Women will vote for the first time at a full State election. A general assembly is also to be held.

The women's vote is the uncertain quantity.

It is known now that the robbery,

destruction by fire and failure of the Farmers and Merchants Bank of Tolu, Ky., near Marion, is to be cleared by court action. P. B. Croft, president, and John H. Lewis, vice-president and cashier, both accused of looting and burning the bank, have been held for the Crittenden county grand jury. Croft formerly was rated as worth almost \$1,000,000. The failure is the largest involving a bank in Kentucky in years.

### DENVER

DENVER, Sept. 25.—The Port Lewis school coal lands near Durango will be sold to the Pacific Steel Company of Los Angeles, presented by Land Commissioner, as the recommendation of Atty. Gen. R. B. Fleming, who yesterday completed negotiations for dis-

posal of the land.

Rain and snow in the Mount Evans area during August seriously interfered with construction work on the Mount Evans Highway, and as a result the plans of the contractors to complete the work to Summit Lake were not finished according to the State Highway Department. It is

planned to place maintenance crews on the completed section of the highway early next spring to put the road in the best possible condition for heavy motor traffic and to continue the construction work as early as possible next year.

### CLOTHIERS BEMOAN MEN'S STYLE APATHY

CHICAGO, Sept. 25.—Men succumb to charming styles much slower than do women, to the poignant grief of designers, tailors and dealers in ready-made clothing who would rejoice to get men wrought up to the point where they would buy a new outfit every change of the model, which is common to women. But the styles do change, as witness the passing of the bowler hat, the box-toed shoes, the freak coats with oblique pockets, the wing collar and other relics of bygone days.

Men's fashions have turned to favor, but the boiled shirt, the detachable cuffs, especially those made of celluloid that led passers-by to believe the wearer was operating a typewriter until his sleeves were pulled, and heavily padded shoulders, have gone to join the dodo bird. This was made strikingly clear today at the opening of the convention of the National Association of Retail Clothiers.

Hip pockets are much larger this year and narrow cuffs will be worn on trousers. The main idea in new clothing for men appears to be comfort. Homespun are in style, but tweeds, flannels, etc., for vests and ties, are not in good taste. The former collar affected by college enthusiasts, reaching up to the ears is no longer recognized as stylish, or even to be copied, and is out on the vaudeville stage. Soft browns and greys in herringbone and homespun designs lead in favor.

**Coso Volcanic  
Iron Water**

In 3 Weeks, After Suffering  
15 Years

For 15 years I suffered daily with stomach and liver trouble. At the suggestion of a friend I purchased a case of Coso Volcanic Iron Water and almost from the beginning my acid stomach and constipation were relieved and my whole body vitalized with the volcanic iron. Today I am absolutely well and feel 20 years younger. My interest in those who suffer alone prompts me in making this statement.

**OVERWORKED MOTHERS**

We all know them. Mothers who in their anxiety to keep their homes neat and attractive and their little ones well dressed as their playmates, toil on day in and day out, sweeping, dusting, mending and cooking, often suffering from backache, pain in side, headache, nervousness, sleeplessness, all symptoms of more serious ailments. Thousands of such women have found relief from such suffering by taking Lydia E. Pinkham's Vegetable Compound, as is evidenced by the letters of commendation continually being published in this paper. For nearly fifty years this old-fashioned root and balm medicine has been restoring ailing women to health and strength.

**ATTACK DESCRIBED**

"That during said month of January, 1914, while the said Charles R. Watson was en route from his domicile at El Paso, Tex., to his place of employment at Chihuahua, Mex., he was attacked by a band of Mexicans at Santa Isabel, Mex., on January 10, 1914, and that he was beaten and that the said Charles R. Watson, and Charles R. Watson, minor son, all of whom are dependent upon the said Charles R. Watson for their support."

"Fifth, that damages in the amount of \$100,000 are requested from the German government by taking Lydia E. Pinkham's Vegetable Compound, as is evidenced by the letters of commendation continually being published in this paper. For nearly fifty years this old-fashioned root and balm medicine has been restoring ailing women to health and strength.

**NOTE CONFIRMATORY**

"On June 20, 1916, the then Secretary of State, Lansing, in the course of a note denouncing the Mexican administration made the following statement of the incident:

"For example, January 3, troops

were requested to punish the band of outlaws, which looted the Ciudad Mier, forty-eight miles west of Chihuahua, but no reprisal suits came from that request. During the month the bandit Villa with his band of about 200 men was operating without opposition between El Paso and Santa Isabel, in fact well up to Carrizosa's authority while a party of unfortunate Americans started by train from Chihuahua to visit the Cusi mines after having received assurances from the Carrizosa authorities that the country was safe, and that a guard on the train was not necessary. The Americans held passports of safe conduct issued by authorities of the de facto government."

BY BOBERT B. ARMSTRONG  
(EXCLUSIVE DISPATCH)

WASHINGTON, Sept. 25.—Filing of a claim for \$100,000 for the death of an American in the Santa Isabel massacre in the State of Chihuahua, Mex., on January 10, 1914, before the Mixed Claims Commission in an effort to recover this sum from Germany, may expose to publicity all the operations of Germany in the southern republic prior to the time when the United States became engaged in hostilities. This is the first claim of this kind filed of record. It was made by the widow of Charles R. Watson, an American mining engineer.

The contention is fully set forth in a petition filed to the Mixed Claims Commission and the claim itself, which are as follows:

**Mixed Claims Commission.**

**United States and Germany.**

"Gentlemen: I demand that you find two copies of the claim in the matter of Mrs. Nell A. Gregory, widow of the late Charles R. Watson of McGhee, Ark., against the government of Germany.

Very truly yours,

**CHARLES R. WATSON.**

**NOTICIAS MUNDIALES  
DE ULTIMA HORA**

En obsequio a nuestros numerosos amigos de habla española, para beneficio de los lectores americanos del Times que estudien esa lengua, publicamos diariamente esta columna en castellano, con un extracto de las más importantes noticias de última hora.

Buenas partes del futuro progreso de Los Angeles, que es la metrópoli de los Estados Unidos que más cercana se halla a territorio latino-americano, habrá de depender de las relaciones que logremos establecer con nuestras hermanas, las repúblicas del sur. Para que lleguen a ser enteramente cordiales, no hay nada tan importante como que nuestros ciudadanos nos familiaricen con la lengua castellana. Tan solo dan cuenta de este hecho nuestros habitantes, que hay al presente más de 35,000 personas que estudian español en Los Angeles. A ellos conviene leer todos los días esta columna en la que encontrará español correcto y enteramente moderno.

**NOTAS TELEGRÁFICAS**

Noticias de Washington

WASHINGTON, Septiembre 25.

El Presidente Coolidge pudo estar seguro del apoyo republicano en todo el país, incluyendo la Nueva Inglaterra, si continúa haciendo bien, como lo creen y esperan los republicanos, y en tal caso obtendrá una victoria en el jefe del comité de investigación que se lleva a cabo en la convención nacional republicana. De lo contrario, tendrá que haberse atraído una tensa oposición.

Los diputados de los estados están desorientados y desengañados por parte de Henry Ford en el proyecto de ley que propone el presidente.

El Ministro de Agricultura ha publicado un informe sobre la situación trágica, después de haberse celebrado un consejo de ministros en el cual se discutieron las propuestas de rebaja de los derechos de exportación de los saboyanos y el recelo de que el turco moleste las costas de Nápoles y Sicilia, agitanan el pensamiento de los agricultores europeos. Existe una tensión entre las autoridades norteamericanas y las de los países vecinos, y el resultado de que el turco moleste las costas de Nápoles y Sicilia, agitanan el pensamiento de los agricultores europeos.

El Presidente Coolidge ha recomendado por el Comité de Hacienda la aprobación del proyecto de ley que propone el presidente.

Los Trabajadores Marítimos han

apostado con el Partido Republicano.

NEW YORK, Septiembre 25.—Los diputados de los estados del puerto discutieron hoy la proposición de aumento de sus jornales en un 7 1/2 por ciento, que les hicieron ayer los navieros, en una reunión de los representantes de los trabajadores de los puertos y de aumento de sus derechos de entrada.

Va a ser recomendada por el Presidente Coolidge la aprobación del proyecto de ley que propone el presidente.

Los Trabajadores Marítimos han aprobado con el Partido Republicano.

NEW YORK, Septiembre 25.—La Comisión de Hacienda, en su reunión de ayer, votó la aprobación del proyecto de ley que propone el presidente.

**FRUIT CROPS HURT BY RAIN**

**"Situation Very Serious," Says Fig Grower**

**Raisins on Paper Trays Are Badly Damaged.**

**Storm Expected to Spread Further in State**

**EXCLUSIVE DISPATCH!**  
FRESNO, Sept. 25.—Although it is generally admitted that the situation is serious, heads of cooperative marketing associations here today would not make statements of the extent of damage believed to have been done to crops of the San Joaquin Valley by the rain of last night and this morning. "The situation is very serious" was the statement of President J. F. Newmire of the California Peach and Fig Growers, representing the fig crop outlook. The association, he said, is gathering data on the extent of the damage to the fig crop, but could make no further statement today.

"We are keeping in close touch with the growers and are unable to determine just how serious damage has been done to the raisin crop," said a statement, in part, issued by the growers' service division of the Sun Maid Raisin Growers.

**ADMIT DAMAGE**

Director E. H. Heck of the State Department of Agriculture issued a statement in which he said that considerable damage has been done to raisins drying on paper trays. "This may offer a difficulty to further drying after rain, the growers pointed out here."

Commodities which are sensitive to water and other fruit have an opportunity to dry, is followed by rot of the grape berry, according to Fresno County Mortician and Coroner Dr. F. Bouldard. He said the greatest loss was when raisins on trays had been turned and not set in, particularly about the stems. It is the rot that follows the moisture which spoils fruit more than the moisture, he said, making an estimate of the damage almost impossible until some time after the rain.

**RAIN TO SPREAD**

(BY A. P. DAY WIRE)  
SAN FRANCISCO, Sept. 25.—A low-pressure area over Alaska brought rain to the entire Pacific slope as far south as Fresno last night, and promised precipitation over a much longer and wider area tonight and tomorrow.

Raisin, peach and prune men whose crops are drying in the California valleys are believed to have protected themselves adequately. Some damage is expected to result to the unpeeled grape crop, but it was not known how far it would go, the Weather Bureau, if there is clear weather after tomorrow.

At Santa Rosa .95 of an inch of rain fell. Other figures were: Stockton, .22; Chico, .25; Concord, .45; Modesto, .45; Red Bluff, .50; Sacramento, .54; San Francisco, .46; San Jose, .34.

**GRAPES DAMAGED**

(BY A. P. DAY WIRE)  
SACRAMENTO, Sept. 25.—Considerable damage to the grape crop of Northern California was caused by the general rainstorm which visited the state yesterday. There are prospects that the prune crop, which has been under cover for some time, will also be damaged because of mold, it was stated here today by Dr. T. L. Taylor, manager in charge of the United States Weather Bureau. Neither Taylor nor the office of E. E. Kaufman, Federal crop reporter, could be reached yesterday, but it was learned that an estimate as to the amount of damage, virtually all other fruit was said to be out of the way.

**EXCLUSIVE DISPATCH!**  
SANTA BARBARA, Sept. 25.—Light showers have fallen over Santa Barbara county today, but were insufficient to measure. Threshing was stopped in all sections of the day, but the mountains, the main grain centers in the rents, bringing all forest fires under control, the Forestry Service announced.

**Edison Worker Struck by Auto Expected to Die**

**EXCLUSIVE DISPATCH!**  
BAKERSFIELD, Sept. 25.—R. F. Anderson, 25 years of age, was probably fatally injured early today when he stepped in front of an automobile near the Kern River bridge. He is in a local hospital.

Anderson, an employee of the Edison Company at Big Creek, was coming to Bakersfield with Harvey Murphy, whom he had known but a few days. They stopped across the highway from the community station, the day before, and Anderson went across to the station. Going back he stepped in front of the machine driven by a man named Hall, a resident of the Arvin addition.

Anderson has a sister in Woodland, it is said.

**POMONA RESIDENTS FIRE ON PROWLERS**

**LOCAL CORRESPONDENCE!**  
POMONA, Sept. 25.—Flying bullets sent two would-be burglars fleeing from homes in different parts of the city last night. Hearing someone trying to gain entrance into his home, Mr. Deister, 353 Lincoln avenue, arose and made an investigation. Peering outside, he saw a man trying to force his way into the house. Deister, a police man, quickly turned and fled through an alley. A Peterson, 553 West Holt avenue, also fired at a prowler said to have been acting suspiciously about his house during the night.

**BLISSFUL BREEZE BETRAYS BOOZE**

**Pomona Officers Follow Their Nose, Seize Ten Barrels**

**LOCAL CORRESPONDENCE!**  
POMONA, Sept. 25.—A pleasant breeze combined with a keen sense of smell, played havoc with an alleged "boozest" this morning and as a result, Antonio Di Egidio, 1162 West Second street is confined in the local jail, and eight barrels of wine, two barrels of grape juice and a machine for masking the mask were confiscated.

Officers Fuqua and Phillips were jaunting along West Second street when the aforementioned breeze wafted the well-known scent to their nostrils. They immediately commanded a truck and proceeded to Di Egidio's house. Knocking brought no response from within whereupon they broke the door down.

Mr. Di Egidio protested loudly but the officers proceeded at once to the attic where the husband was found in bed. Investigation located the eight barrels of illicit liquor and mash in the cellar. All were loaded on the truck and hauled to the police station.

**ADMIT DAMAGE**

Director E. H. Heck of the State Department of Agriculture issued a statement in which he said that considerable damage has been done to raisins drying on paper trays. "This may offer a difficulty to further drying after rain, the growers pointed out here."

Commodities which are sensitive to water and other fruit have an opportunity to dry, is followed by rot of the grape berry, according to Fresno County Mortician and Coroner Dr. F. Bouldard.

He said the greatest loss was when raisins on trays had been turned and not set in, particularly about the stems. It is the rot that follows the moisture which spoils fruit more than the moisture, he said, making an estimate of the damage almost impossible until some time after the rain.

**Judge Banishes Man From Home After Gun Play**

**EXCLUSIVE DISPATCH!**  
BAKERSFIELD, Sept. 25.—The National Bank of Bakersfield, recently purchased by the Valley Bank of Fresno, has undergone a change in directorship.

E. H. Loveland of this city, and James Oden, City Manager of Bakersfield, have been elected director and vice-president. E. F. Sims, vice-president of the bank was named as cashier to succeed J. K. Kelly Russell, local business man, who resigned.

A general reorganization of the directorate of the National Bank of Bakersfield was affected.

Loveland, president of the E. H. Loveland Produce Co. of this city, has been prominent in business circles here for many years.

Oden is an oil man and capitalist.

He has been a resident of Bakersfield for many years. Loveland will fill the vacancy left by Harry Ray of Fresno, while Oden will succeed M. K. Cromwell also of Fresno.

C. E. F. Sims, while formerly vice-president of the institution has been manager of the bank for the last five months. He came to the local bank at that time from the Federal Reserve Bank.

**REDLANDS CLUBS HEAR JUDGE BLEDSOE SPEAK**

**EXCLUSIVE DISPATCH!**

REDLANDS, Sept. 25.—Rotarians and Kiwanians of this city gathered at the Contemporary Clubhouse to celebrate Constitution Week and listened to an address on "The Constitution" by Judge Bledsoe, president of the Los Angeles Bar Association.

Judge Bledsoe told of the writing of the constitution and the work of authors who provided for almost every contingency that this country had to meet.

Those changes and doings away with the sale of liquor, have come about through a growth and change in the people, he said.

Warren Tinkham and Archie Covington had charge of the musical program.

George H. Hoffman in making the 150 column sing, Miss Dwidays Fugh sang two solo's. Miss Vera Van Loan accompanying her, Halsey W. Allen, attorney of this city, acted as toastmaster.

**TOWNS TO CELEBRATE BRIDGE'S COMPLETION**

**LOCAL CORRESPONDENCE!**

MONROVIA, Sept. 25.—Opening of the new Foothill Bridge across the San Gabriel River, now nearing completion, will be the occasion of a general jollification on the part of Monrovia, Azusa, Glendora, Duarts and other towns. The San Gabriel Valley Agricultural Chamber of Commerce, probably will have charge of the celebration. The great span built at a cost of \$125,000, was finished several months ago, but work on the approaches was delayed. The bridge, which is to be completed and the east and west ends will be ready soon. It is reported that the bridge will be open for traffic about October 15. The old wooden bridge, long ago condemned, will be removed.

Previously to the social meeting, Miss Walter, president of the club, and the program for this year will be outlined and the aims of the organization for this year will be definitely established. The social meeting will be held on Wednesday afternoon after school.

Those who form the executive board are: Miss Walter, president; Geraldine Peacock, first vice-president; Eva Massey, secretary; Elsie Manni, treasurer, and Miss Grace Bird, vice-principal of the high school, who acts as advisor to the league.

**FLYERS ESCAPE DEATH**

**FAIR Able to Right Plane Only 300 ft. off Ground**

**LOCAL CORRESPONDENCE!**

POMONA, Sept. 25.—Recovering control of their airplane within 200 feet of the ground after it had gone into a tail spin at an altitude of 4000 feet, Red Richter, 16, and James Phillips, machine, both of Los Angeles, made a narrow escape from death near China late this afternoon. Both men were jarred up considerably by the impact. Pilot, however, succeeded in making a fair landing in the farm yard of E. W. Evans on West China avenue, one mile west of China. The pilot was uninjured, but his passenger was moderately, after landing and crashed through a fence and into a hay rake, demolishing both and causing much damage to the plane. When the accident occurred, the men were enroute to Redlands from Los Angeles.

**REQUESTS FUND; GETS ARRESTED**

**Pitcher Goes to Well Once Too Often**

**Ventura Man Responds Twice, Then Balks**

**Accused Man Nabbed While Waiting Cash**

**EXCLUSIVE DISPATCH!**

VENTURA, Sept. 25.—Emil Steiner arrived here from San Francisco today in charge of Deputy Sheriff Suyar, E. Vols says that Steiner wired him from New York a week ago saying he was engaged in the business of famous German vintage but had been arrested and it would take \$100 to square it.

Vols says he wired the money, recently Steiner, who is a private eye, came to him and said he was \$50 over on them, Keller produces the \$50. Vols wired Keller a few days ago from San Francisco that he was to be released for violating the Volstead Act and please send him \$100. He gave an address where the money was to be sent. When he went to get it, the police met him.

**DIRECTORS OF VALLEY BANK NAMED**

**Changes Are Made by Bakersfield Institution to Suit New Management**

**EXCLUSIVE DISPATCH!**

BAKERSFIELD, Sept. 25.—The National Bank of Bakersfield, recently purchased by the Valley Bank of Fresno, has undergone a change in directorship.

E. H. Loveland of this city, and James Oden, City Manager of Bakersfield, have been elected director and vice-president of the Superior Court in San Bernardino county, is made a defendant in the latest suit brought against the House of David colony at Benton Harbor, Mich.

Mr. Loveland created a sensation in the county several years ago when he left the bench here, sold all his property in the county and took his family back to Benton Harbor, where he put his money in the colony there.

Writing to friends here he says that the prophecy of the troubles of the House of David is being fulfilled.

The prophecy was that the group would be placed against King Benjamin Fornell and that he would pass away, but a more righteous one would be raised up in his place.

Mr. Loveland, while formerly vice-president of the institution has been manager of the bank for the last five months. He came to the local bank at that time from the Federal Reserve Bank.

**DEWHIRST NAMED IN CULT SUIT**

**Former Redlands Lawyer Defendant in Prosecution of House of David**

**EXCLUSIVE DISPATCH!**

REDLANDS, Sept. 25.—Harry T. Dewhurst, formerly prominent attorney of Redlands and for one term judge of the Superior Court in San Bernardino county, is made a defendant in the latest suit brought against the House of David colony at Benton Harbor, Mich.

Mr. Loveland created a sensation in the county several years ago when he left the bench here, sold all his property in the county and took his family back to Benton Harbor, where he put his money in the colony there.

Writing to friends here he says that the prophecy of the troubles of the House of David is being fulfilled.

Hugs, What Then?Sage of Bakersfield  
Tears His HairRetired Spooners Complain  
With ComplaintsINCLAVE DISPATCH  
BAKERSFIELD, Sept. 25.—Though the attorney's office is continuing to look into the truth of the story concerning Mrs. Ruby A. Laub, the circumstances of the death of John M. J. Knight are being investigated to determine if the oil operator's widow will furnish information that will divert at least some of the responsibility from the police.

Al DeWitt, a former employee of the oil company, who has been accused of killing Knight, was found dead Saturday morning. He is said to have been found near the Savoy Hotel.

The initiative and energy of Bakersfield youth in their motor racing parties has apparently been interrupted or interfered with.

Announcement last week that the state law prohibiting love-in driving in the state had been suspended for the moment only, it seems.

Bakersfield's volunteer firemen driving brigades were extremely alert and observant over the weekend, and a suitably dressed Bakersfield youth flooded with reports of trouble by Bakersfield youths to prevent the antisocial drivers from meeting again.

Knight was discovered to be a man of the world, who has grown, and perhaps forgotten his "spooky past" that sometimes he used to stop this innocent.

WITHIN THE LAW

Gay Lethario and the young things are absolutely plying with respect and the antisocial drivers are maintaining solos, but "hey, it's still a huggin' 'billie'" and just as open as ever on the way," as one particularly good-looking girl is teaching him to drive the Aliens holds the steering wheel, of course, some can hold Aliens. And there you go.

Secretly, hoping that she finds something of value to shatter "Daddy's dream," yet goaded by the desire to return to the retired spooners, Herman McBliss, imploring her to do so, she gave him his interpretation of the law, and where and when, if ever, a boy can be arrested for anything against the law. The contrary, she can do anything she wants.

She contrariwise emphatically "mind our own business."

LILIA LEE'S MOTHER  
TO HELP HUSBANDSHE DENIES HE HAD CHARGE  
OF \$125,000 LIQUOR FUND  
IN WEST

BY A. P. DAY WIRE

CHICAGO, Sept. 25.—Mrs. Charles Appel, mother of Lila Lee, motion-picture actress, has come from California after having lived three years with her daughter, and declared she and Lila and the latter's husband, James Kirkwood, were behind Mr. Appel to the last ditch.

According to a son, despondency induced by acute rheumatism, from which, despite the care of specialists, Mr. Appel failed to recover, probably caused him to kill himself. Mrs. Cochran and a nurse who has been attending the real estate man since the family's return Sunday from Craig-Mawr, their Mackinac summer home in another room of the suite when Mr. Cochran died from the window.

## MARKET TREND OUT OF STEP

**Quotation Manipulators No  
Longer Point the Way**

**Business Men Less Interested  
in Speculative Matters**

**Farmers, Politicians and the  
Federal Reserve**

BY ARTHUR D. WELTON  
(EXCLUSIVE DISPATCH)

CHICAGO, Sept. 25.—Stock Exchange quotations continue to be out of tune with business conditions. Corporate earnings, dividends and prospects are better than speculative appearances and operations indicate. The public, as reports often state, is not interested in a market which fails to register the spirit and condition of business. The public, too, is not interested in stock prices and their inexplicable fluctuations which often repeat the investor who takes account of speculative price movements and has turned to the bond lists in search of a place to put his idle surplus funds.

The temper and knowledge of the business man of today is not what it was ten years ago. Market manipulators are no longer the leaders on whose wisdom and foresight dependence is placed. Every business man is now in possession of masses of statistical information and many of them have at their elbows men trained and equipped to analyze and digest the information and to furnish the application to the particular case which confronts the executive.

Many who are interested exclusively in speculation are inclined to stay at the work of economists and statisticians who are charged with efforts to reduce business operations to certain formulas. That, however, is not their aim. They are producing the basis for the formulation of judgments and supporting discretion with facts and a knowledge of the relations of the market among varying lines of business.

The Federal Trade Commission is quick to take action when this information is placed in the public domain and turns to each particular use that it influences the conduct of a whole line of industry. It comes then to be classified as a possible violation of trade rules and is frowned on and ordered to cease and desist.

Operators in the stock market haven't issued such order, but they are learning signs of the times and turning to much particular use that it influences the conduct of a whole line of industry. It comes then to be classified as a possible violation of trade rules and is frowned on and ordered to cease and desist.

**STRENGTH**

THE figures on the earnings statement and the balance sheet are the surest indices of a Company's strength and prosperity.

Consolidated balance sheet of the CALIFORNIA PETROLEUM CORPORATION—one of the leading oil producing companies of California—as of July 31, 1923, shows that after giving effect to the present financing, NET QUICK ASSETS of the Company will be in excess of \$10,000,000—or 125% of the face amount of the 10-year gold bonds.

Consolidated Net Earnings of the Corporation since 1917, after providing for Federal Taxes, have averaged 5.23 times the annual interest on all funded debts, including this issue. Net earnings for the seven months ended July 31, 1923, were at the annual rate of 18 times these interest requirements.

Backed by this unusually favorable record, we offer and recommend

**BOND QUOTATIONS**

Narrow Limits  
(BY A. P. NIGHT WIRE)  
NEW YORK, Sept. 25.—Bond prices moved irregularly within relatively narrow limits in today's trading on the New York Stock Exchange. Active United States government issues held steady in dull trading. French and Belgian bonds improved moderately in the favorable news from abroad. Bonds due advancing a point. Tokio is up 1 1/2.

Railroad bondholders generally were inclined to be reactionary. The market, however, was very narrow. Losses of a point each were recorded by Wheeling and Lake Erie Consolidated 4%, Western Maryland 4%, and Interborough Rapid Transit 6.

Industrial bonds were mixed. Republic Steel 5½% advancing nearly 2 points and Fish Rubber 8½%, while Wilson & Co. convertible 6% dropped 1 1/2 and Brooklyn Edison 1 1/2.

NEW YORK, Sept. 25.—Following are the closing quotations of bonds listed on the New York Stock Exchange. Purchased by Ladd & Bryan, 620 South Spring street.

### Insure the Permanent Welfare of Your Heirs!

It is your responsibility, while  
living, to make arrangements for  
the disposal of your estate after  
you are gone.

The average man does every-  
thing while his power, while living,  
to accumulate a nest egg, but  
very often he neglects to provide  
sufficient assets for his heirs.

The terrible Inheritance Taxes  
must be paid, after your death,  
before your estate can be dis-  
tributed, may absorb the very  
last of what you have accumu-  
lated, unless your interests are  
properly safe-guarded.

A Life Insurance Contract, pay-  
able to individual Beneficiaries will  
eliminate the possibility of loss in  
connection with the disposal of  
your estate.

### NEW YORK CURB

First Opening

NEW YORK, Sept. 25.—Prices in today's  
market show a decided downward trend with the main  
activity on the downward side. Reasons of new  
prices were revised and had a depressing effect on a  
Standard Oil of Indiana and New York each  
point. Trading in December con-  
tinued rather slow and the market was  
quiet. Pennsylvania, Mexico and Im-  
perial Oil companies were the only ones whose  
prices were revised during the day. The others  
were sold on the same basis as the day before.  
The market would be among the first to  
offer a rally if conditions in other com-  
panies improve.

Mining stocks fluctuated within narrow limits  
yesterday. Principal activity again in the Pennsyl-  
vania market.

Following are the closing quotations and sales  
of stocks of the Curb of the New York Stock  
Exchange, taken from the latest issue of the

## OIL INDUSTRY GROWTH SHOWN

Paper of 1865 Describes First Shipment

Three Hundred Gallons in Initial Cargo

Contrast With Activity Now is Marked

From 300 gallons of crude petroleum to 25,000,000 gallons of the same product is a far cry, even in fifty-eight years. Los Angeles Harbor today is the world's largest oil port and it was on August 23, 1865, that the first water ship, the "Sundam," was dispatched from the then port of Wilmington on the steamer Pacific.

In the files of the Wilmington Journal of that date was found this in the following article:

"Mr. G. Sundam arrived in Wilmington yesterday from the oil springs of the San Fernando district with 300 gallons of petroleum. It is consigned to Banning Co. for sale under the name of 'Sundam.' This oil, by analysis, contains 87 per cent illuminating and 33 per cent lubricating properties. Mr. Sundam returns to the oil springs today with cans sufficient to secure 800 gallons for the following summer."

### CONTRAST IS GREAT

The 300 gallons left Wilmington three days later on the Pacific. There is a long stretch between the old Pacific, with her lofty spars and spreading yards carrying a cloud of canvas, to the present day silent tank steamers like the John D. Rockefeller, which carries 125,000 barrels of oil, and departing from Los Angeles Harbor for the ports of the world at the rate of seven and eight steamers per day.

Today there are huge oil-loading terminals and storage facilities, is exporting petroleum at the rate of 15,000,000 barrels monthly.

There is noted a wide difference in the number of oil wells in California, greatest industry to its present gigantic scope, with mile-deep gushers, 15,000-barrel producers and \$10,000,000 refineries. In its issue of February 10, 1865, the Wilmington Journal said:

**FLOW OF FIFTEEN BARRELS**

"Petroleum Springs have now been discovered on the Cananea Ranch, in the vicinity of San Fernando. It is now owned by Don Andres Pico. The springs, or wells, have been drilled to a depth of 250 feet and are flowing at the rate of fifteen barrels per day."

Again:

The Buena Vista Company of Los Angeles is constructing a refinery with a capacity of 300 gallons per day. The machinery is being manufactured by Coffey & Riden of this city and will cost complete \$4700.

In those days kerosene was being refined throughout the State and sold at 60¢ barrels per month, retailing at from 45 to 75 cents per gallon. Gasoline was then unknown.

## AIR-NAVY BATTLE PICTURED

Dreadnaughts and Planes Combat Theoretically in First Annual Anti-Aircraft Practice Off Harbor

An aerial setting for one of the great battles of the World War was painted across the sky yesterday, thirty miles offshore, by three dreadnaughts of the United States battle fleet and a squadron of flying airplanes. Spreading puffs of white, daring, dropping planes from beneath the blue of the three-inch anti-aircraft guns were used against the tiny fighting planes, while they themselves laid down rolling curtains of smoke, behind which they maneuvered unseen by the dreadnaughts below.

The remaining units of the battle fleet will carry out anti-aircraft practices, together with torpedo and torpedo-defense practice, during the next fortnight. The first actual firing of these practices will be planned for the drill week October 28 to November 1, shortly after the fleet's return from San Francisco.

Visibility was almost perfect—not a trace of chancery haze—and the fleet was able to spot a target down on the very eaves of the horizon. Aerial smoke shells to trace the accuracy of the

## COUNTESS RETAINS ALIMONY Actor Fails to Get Any Reduction

Mrs. Alfred Hollingsworth

### BENOITS REARRESTED ON LARCENY CHARGE

George and Leo Benoit, arrested some months ago on a charge of stealing building materials and subsequently released, were rearrested Monday on charges of grand larceny and burglary. They were arraigned before Justice White and held on \$3,000 bail each.

Both men, it was learned, glorified a house under construction at 326 Foothill Boulevard and stole \$500 in cans from three companies on June 15, last.

### W.C.T.U. POSTPONEMENT

The regular meeting of the Women's Christian Temperance Union, which had been set for this week, has been called off, according to announcement yesterday by officials of the society.

## AIR-NAVY BATTLE PICTURED

Dreadnaughts and Planes Combat Theoretically in First Annual Anti-Aircraft Practice Off Harbor

Yesterday in the disappearance of Robert McCabe, 14 years of age, while on the way to Los Angeles, despatched yesterday when Chief of Police Turner of Spokane wired that the boy cannot be found in that city. He was last seen there on Monday. The boy started with his mother, Mrs. Helen McCabe, who had come to California with a mobile driven by Cecil C. Cook, who contracted to bring the two to Los Angeles. At Denver, Mrs. McCabe became ill, and sent the boy on to Los Angeles with Cook, who made his home with J. Howard. When Mrs. McCabe was recovered, she resumed her journey, but was greeted on her arrival with the information that the boy had never reached this city. The boy telephoned from the boat in Spokane, asking for money to come to Los Angeles. There was no explanation of how he happened to be in Spokane.

McCabe was all the more perplexed because he was not prosecuted by Dep. Dist.-Atty. George Brown, who was on trial, pleaded guilty last week to three counts of first degree burglary and was sentenced to a period of from three to forty-five years, the sentence to run consecutively.

The counts were constituted of robbing a number of real-estate offices and garages in the South Western Avenue district. Two other men, E. M. Bushy and James Franklin, appeared with Walter and Fred and pleaded guilty and are now serving sentences of from one to fifteen years each at San Quentin. They were all prosecuted by Dep. Dist.-Atty. Frank Brown.

McCabe, 14, was on trial, pleaded guilty last week to three counts of first degree burglary and was sentenced to a period of from three to forty-five years, the sentence to run consecutively.

The first complaint under the new law providing for the sterilization of persons convicted of statutory offenses was issued yesterday by Dep. Dist.-Atty. Mc Clellan against Jack Warren, 26 years of age.

Warren is accused of attacking a 7-year-old girl. According to Dep. Dist.-Atty., he had confined to similar crimes on little children at Denver, Colo.

The complaint was issued under section 445 of the Penal Code. This section is added to the code by the new state constitution, the result of the Crime Commission. It provides that persons convicted of social crimes shall be sterilized.

### RELEASED TWO TIMES

Odd Complication Has Favorable Result for Accused Man

Issue of a bench warrant yesterday for the arrest of A. Haynes of the Hayes Furniture Company,

1515 North Main street, resulted in his being released from two jails.

The bench complaint was made by Assistant Deputy Commissioner Tibbet of the State Labor Bureau, after Haynes had failed to answer several subpoenas in a wage-claim case brought by Romeo Belanger and E. W. Anderson.

Haynes was found lodged in the County Jail on a charge of bootlegging. In consideration of his having applied for probation in the bootlegging case, no objection was made to his being released at once to a friend under the habeas corpus warrant. Whereupon he was lodged in the City Jail.

It was then discovered that just before his arrest as a bootlegger, he had filed a petition in bankruptcy, which was granted by the San Joaquin Labor Bureau, and removed to the remote future, the possible settlement of the wage claims of Belanger and Anderson.

Assisting attorney will be Henry Conner, Harry N. Nichols, pianist; Miss Janice Kasparian, violinist; Miss Helena Kazmarik, accompanist; Japanese dancer, Misses Yae-San, Harue-San, Sadie-O-San, Yetsu-Ko-San, Midori-San, Kae-San, and piano musicians: En-San, Tama-San, Mariko-San, Kimiko-San and Tamie-San.

## PLANS MAKING CITY SAFER

Vollmer Tells Realty Board of Proposal to Create More Police Divisions in Crime Drive

The work of reorganizing the Police Department and making it so effective that Los Angeles will be "not only the healthiest but also the safest place in the world" has only begun, Chief of Police Vollmer told members of the Realty Board at their noon luncheon yesterday.

To make the work of crime detection effective in a maximum degree, Chief Vollmer declared, it will be necessary to reduce the area of each police division to such an extent that the man in charge of these divisions will know the people and the conditions in the territory intimately.

### PEOPLE ALSO BEHEADED

Chief Vollmer did not name the public in his address. It is not only the courts which therefore allow the police to aid the criminals but also the people who are too busy to notice the wrongs committed. Coupled with this, he said, is misdirected and unintelligent criticism of officers by the public, resulting in a lowered morale in the department.

The need for impressing the criminal element with the certainty of punishment was stressed by the Chief, who added that he was preparing to ask the City Council for much new equipment to further this plan.

## SIX OIL DIRECTORS SUED

Globe Petroleum Corporation Men Involved in Actions Totaling Approximately \$800,000

Six suits for approximately \$800,000 were filed against six directors of the Globe Petroleum Corporation yesterday by four stockholders of the corporation. The directors are charged with obtaining the amounts named through an illegal agreement made with the fifteen directors of the corporation.

Each of the six suits is filed against a separate director in the corporation, based on the same charges. Don S. Hunter is sued for \$20,150, W. W. Stabler for \$12,500, Charles Lloyd for \$10,500, A. H. Fenoli for \$24,000, H. J. Cook for \$6,000, and J. S. Narow for \$4,000.

The complainants charge that on July 25, 1922, the six directors of the corporation made an agreement whereby various directors should advance money for drilling a well at Huntington Beach.

Hunter, it is alleged, loaned \$25,000 to the corporation, which he made a loan of \$25,000, with the understanding the should get \$2500 in oil. Instead, it is alleged, the corporation was given 25,000 shares, with a par value of \$100 each, but an actual value of 25 cents each.

The suits were filed by Attorneys L. L. Landau, on behalf of the stockholders, and E. Gould, Jr., and A. H. Moore and Harold V. Mathews, on behalf of the corporation.

The four plaintiffs have a suit pending against the corporation and its board of directors, seeking the recovery of the amount for the loans from the six directors.

The suits were filed in the Superior Court, Los Angeles, and will be heard on September 26.

## BURGLARS GIVEN LONG SENTENCES

Heavy Penalty Imposed by Judge Hardy on Trio of Prisoners

The teeth of the law bit deep yesterday in the cases of Wesley Falls, George Walker and Frank Brown, and the trio will start for San Quentin for varying periods sometime today.

The three prisoners, all convicted burglars, were sentenced yesterday by Judge Hardy of the Superior Court. In imposing sentence, the court declared that he was taking into consideration the public interest in the safety of the community.

Presentation of copies of "The Manual of Criminology" prepared by Dr. H. R. Beaman of the association's educational department, for the use of teachers, was made to Superintendent R. M. Killian and his teaching staff by Secretary of the Association, Lankershim Chamber of Commerce and other organizations participating.

Presentation of copies of "The Manual of Criminology" prepared by Dr. H. R. Beaman of the association's educational department, for the use of teachers, was made to Superintendent R. M. Killian and his teaching staff by Secretary of the Association, Lankershim Chamber of Commerce and other organizations participating.

When the man was captured, he was full of thrills. The most recent husband asserted that his wife's new lover was his estranged wife's sudden and unexpected action in leaving him, and went to considerable trouble to discover her whereabouts.

Where he found her in the French Laundry, Lankershim, he was engaged with activity of a vicious nature.

Kia Kia Flappers Get Cold Shoulder

Jazz's Orchestra Rolls Up the Parlor Rug

MARKSON

the skins from white animals to the barbs of the lion, whether it is a hollow log capped in a complete symphony. Therefore, we have the dance music of Flamingo, California. Last night to a meeting of William F. Alder's "Kia Kia Cannibal Flappers," who would just sink a pearly tooth into a shoulder as not other girls were lacking after a dance session. Mr. Alder was fascinatingly hideous, and yet with a primitive picture.

Associate the jazz music with the Kia Kia Flappers, too, in this senseless music. The orchestra, for instance, played "Don't Make Your Mama Cry Over You," plus a minor carnival in its effort to make them forget you? Particularly if you were not well done and dancing was insufficient.

BOOKED FOR SERIES

ing Mr. Alder and the members of Flamingo's orchestra to the Kia Kia Flappers, who have presented a number of enjoyable radio programs. The members are Herb Jacobs, Dick Schultz, saxophone; Gene Vely, saxophone; Jim McLean, Dick Kumer, Al Pfeiffer, banjo, and the drums. The band has been throughout Radioland, featuring the orchestra launched such numbers as "Perfume of Hawaii," "Japanese Girl," "Young Love," "Rags," "and shoulders shook to death. Radioland was par-

adise, once the Preacher Gandy had assayed his fury with him for two hours at KHJ last night, George T. Vallance, a rich singer with all the attributes of a great lyrical vocalist.

WELLAUDER SONGS

Presented by Stanley Vallance sang "Hawaii," "MacKenzie-Murdock," "Bellavista," "The Summer," and "Hoosier." Among the last song was sung "Absent," and "I'd Like to be in Texas When They Round Up in the Spring," a cowboy song. On the matinee program he favored with a sacred number, "Face to Face," with "Perfect Day," by Car-

Dorothy, accompanied by

HISTORY REPEATS  
The new postmaster at Covina is Bill Nye—a name which invites cheerful recollections and cordial memories. Regards to Laramie.KEEPING THE PEACE  
If President Coolidge is able to pacify Senator La Follette and bring him into the fold his qualifications for the grand high leadership will be established beyond peradventure.NOT THE RIGHT SORT  
The man who deserted his wife in order to enter the ministry is going at things backward. We may need preachers, but not to the extent of recruiting them from the ranks of the home-wreckers.A HOUSE DIVIDED  
One of our geological experts says that our oil reserves are such as to continue an unabated flow for perhaps a dozen years ahead, while another distinguished petroleum authority says that we are now at the peak and the stamp will be rapid. You can take your choice.ACTS OF VIOLENCE  
Incidental to the strike of the union printers in New York City three workers were badly beaten, one man was murdered and a truck bearing \$5,000 combination newspapers was set on fire and destroyed. The strikers were merely disciplining the men who wished to work.THE BIG DOINGS  
There is enough lumber unloaded at the Harbor every day to build a little city of 2000 inhabitants. And by the same token they are building almost to that extent right here in Los Angeles and its environs. Much of the lumber remains within gunshot of the Harbor.I HAVE SOME BANANAS  
Our commerce with South and Central America is extending by leaps and bounds. Arrangements are being made that, according to the plans of the promoters, will ultimately bring bananas from Guatemala to Los Angeles Harbor at the rate of 100,000 bunches a month. When we set our banana famine to music the enterprising Guatemalans heard the notes and forthwith stocked a ship with the whalers.THE RATTLER FAMINE  
According to telegraphic advices there is a near famine in rattlesnakes in certain districts in which the rattle has heretofore bloomed in riotous splendor. Old-timers are beginning to worry about it and some households are so reduced that they do not know where their next rattle will come from. The Society for the Conservation of Diamond Backs has not been able to function. Some of the pioneers are inclined to blame the shortage in snakes on the Voilesteed Act and possibly they are right.FROM THE ASHES  
The Bank at Yokohama, one of the greatest financial institutions of the cherry-blossom empire, held its annual meeting the other day upon the ruins of its former massive splendor. With the smoke of the devastated city still rising 'round about the directors ordered the payment of the regular dividend and also gave instructions for immediate rebuilding upon a vast and substantial scale. The action did much to stabilize the emotions of the community and Yokohama turned at once to the serious business of restoration. Earthquake and fire may combine, but they cannot destroy the spirit of man.DIVING FOR GOLD  
Divers have just retrieved from the bed of the ocean the riches haul made in their history. Six years ago, when the White Star liner Laurentic was sunk, she carried down with her a cargo of gold bars. Human beings who are lost at sea are soon forgotten, but mankind remembers the gold. Sporadic attempts have been made at different times to recover the precious metal, and at last these were crowned with success.

The work was done at an average depth of fifteen fathoms, or ninety feet. Even so, it was attended with several fatalities. The business of being a diver is a dangerous and uncertain one, and the slight chance there is of recovering the wealth of gold that went down with ships sunk by German submarines during the war is shown by the difficulty of salvaging this cargo at such a depth. The average depth of the great ocean is over 2000 fathoms, and most of the ships were sunk in places where the sea is too deep for divers to go.

To the Spaniards belongs the record for deep-sea diving. They recovered a cargo of silver bullion in bars from a depth of thirty fathoms, twice the depth where the ill-fated Laurentic lay. The dangers from accidents, faintness, pressure and the attack of savage sea monsters are increased as the divers go deeper and grim oil Neptune will cling to most of the treasure trove he will find.

BREATHING DEFENSE  
According to his talented group of public experts, Hiram Johnson is now in Southern California for the purpose of hurling defiance at his foes.

Hurling defiance is Hiram's favorite gesture. Almost any snapshot will show him in an attitude of audacious challenge to all foemen. Even at Washington he rides like unto a Don Quixote, tilting at the other windmills of the Senate.

At this moment, according to the convulsions of the Johnson press, there is a base and malignant plot to ruin the political career of the Senator. Measured by the lowest advice that may be had, all the vested interests in the nation have united to wreck the political bark of the cherubic Hiram. It is the most dastardly and damnable plot in the history of the country.

Nasty behavior, what?

Yet the fact remains that if there is a plot, Hiram wrote it himself. When a United States Senator takes his pen in hand, he ought to be prepared to write his message on the Capitol steps. When he puts ink to paper, he should be ready to have it posted on the White House wall. If Senator Johnson's former backers in Southern California have lost their standing and reputation, and if his newspapers have ceased to be influences in their communities, the Senator should have the courage to come boldly forth and say it to their faces, instead of burying it in a written message to a confidant. The latter does not seem like the Johnson way. Can't he be as blunt and outspoken with his derrid friends as with his acknowledged foes?

There is an awful poverty in the explanations of the Hearst press. There is said to be a plot to ruin Hiram and yet the Senator is declared to be impervious to plots.

He was recently chosen as United States Senator for a full term and it is declared that his only ambition is to serve the people. If that is the case, let him go to it and not worry about plots. Let him be in his seat in the Senate when important measures are called and let him vote when the time comes. That is more to the desire of the people than to talk much and then dodge when the vote is taken. The error is that Hiram doesn't want to be a builder. He wants to be a voice and a defiance. If he were a pietistic, many would be fain to list him as a common scold. He sees plots in the inhospitable procession of the hours. If there is a high fog, it is a corrupt plan to eclipse Hiram Johnson. If a new quaker is brought in at Signal Hill, it is a nefarious plot to obscure the prestige of the Senator. Hiram is an amateur. His timorous brain sees a plot in every breeze, but his rugged heart gives lusty defiance to them all.

History will not do justice to Hiram until his massive replica, in enduring bronze, is reared as a sentinel at the portal of the Golden Gate. There it should stand until the crack of doom with its ponderous fist raised in complete and contemptuous defiance of all comers—from the Mikado and the League of Nations down to George Hardwick.

Hiram really should welcome the situation. It gives him something else to do. He had almost run out of material and in another month he might have been forgotten. As it happens he may not step blithely forth with a fresh line of defiance in his clenched fist and eager lips. There is a new group of "vested interests" at whose antithesis may be buried.

Axaj defying the lightning bugs has nothing on Hiram.

BROKEN BONDS  
Straw bonds are even less potent than straw bonds and the mills of justice are beginning to complain over their too-frequent submission. There seems to be substantial proof that many ball bonds are accepted that are not really worth the price of the ink in which they are signed. There are certain specialists in bonds from whom not an ounce of indemnity could be wrung, were the screws applied. The District Attorney's office cites cases in which prisoners charged with grave crimes have been able to furnish bonds so puny that they would not hold a grasshopper. On the acceptance of the bond, they have folded their tents and disappeared. The bond might be forfeited, but it could not be collected. The District Attorney now asks a general acceptance of the rule that no bonds be accepted in any of the courts of record unless they are first submitted to him. Of course the judge may approve any bond he likes, but if the District Attorney is informed of the surety, it should improve the quality of the transaction and lessen the opportunities for evasion and scandal. The District Attorney promises to be available in person or authorized representative at all hours in order to ease the situation. It is almost certain that if the District Attorney's office were called upon to check up and approve every bond submitted in the Los Angeles courts some of the sureties now regularly offered would take to the brush.OPEN COMPETITION  
The City Council has announced its intention of changing the specifications for the rock used in the construction of a Los Angeles streets, curbs, sidewalks and gutters so as to open to the widest competition the supplying of this material for public improvement work. This, the Councilmen believe, will result in reduced costs to the property owners who pay the bills, and at the same time produce a pavement that will stand the wear and tear of present-day traffic. The move of the Council is a commendable one and is in line with the spirit of the times. Many rock companies have long complained that the Los Angeles specifications were so drawn that many rock concerns could not bid and that this had the effect of placing the supply of rock for public improvement work in the hands of a few companies which could meet the specifications, or, in other words, gave these companies a monopoly of the rock business for public work. It will not be denied that monopolists take advantage of their commanding position and exact de luxe prices. In the case of rock used on public improvement work, the property owners paid fancy prices for their streets and other improvements, while competitors, who were willing to furnish materials at lower costs, were shut out.

The greatest care should be taken by the City Council, the Board of Public Works and the City Engineer, however, in providing the new specifications engineering tests that will insure to the property-owner a street that will wear. The officials believe that in the new amended specification this protection is assured, and if this is the case,

## How the Old Political Parties Stand on the Ku Klux Klan

Predicted by George Matthew Alford

no mistake will be made by the Council in opening to general competition the bidding for all materials required by the city, whether fire hose, automobiles, or rock for city streets.

DEATH STILL EXISTS  
The application of Abyssinia for permission to join the League of Nations has called the attention of the civilized world to a condition that most people had supposed no longer existed.

This is the flourishing slave traffic in Africa, which has been on the steady increase for the last ten years. Reliable witnesses have testified that they have seen gangs of wretched slaves in chains, being driven along the southern part of Abyssinia for sale in other portions of Africa. This strange little kingdom is the center of the degrading business, but it reaches its tentacles south to the British Kenya colony, north to the Sudan and even across to the seaports of Arabia.

All of the abuses and revolting outrages perpetrated against the unfortunate beings who were brought on slave ships to America in bygone days are said to be flourishing among the modern raiders and dealers. With less excuse, however, as the world is more enlightened and Abyssinia herself has 16,000,000 Christian subjects.

If the petition of Regent Ras Tafari for admission to the League of Nations is granted that body has decided that it will first demand from him promises of assistance in the eradication of the hideous slave traffic in his domain. They do not hope to wipe out slavery within his borders, but the sale of human beings to other nations will be prevented. This matter is to be taken up at the September meeting, and if the League succeeds in wiping out this awful wrong European reformers claim that it will be by no means their smallest triumph.

The Monterrey (they spell it with the double "r") down there, as did the Conde de Monterrey, for whom it was named long before the first Dutchman landed in New York. Steel Works is capable of turning out anything from a nail to a complete locomotive. It has played an important part in the rehabilitation of the National Railways of Mexico in the few years which have intervened since revolutionaries ceased playing havoc with them, furnishing vast amounts of rails, bridge and other structural steel and some rolling stock. It also appears to Washington to be a place which easily could be turned into a munitions factory. It has been employing about 1800 men, on the average, in recent years, but could employ many more if running to capacity.

But the biggest thing back of the Monterrey Steel Plant is Cerro Mercado, the greatest known deposit of iron ore in the world. This was mentioned in the Washington dispatch as Cerro de Hierro (mountains of iron), which is what it literally is, for engineers have estimated that that huge mountain contains enough iron to last the whole world 300 years!

When Cortes conquered Mexico, nothing interested his noble cavaliers more than gold. They heard of a great mountain of red ore many leagues northwest of Tenochtitlan (City of Mexico,) and an expedition at once set out for it. In what now is the State of Durango, they found the mighty mass they named Cerro Mercado. Ever since iron ore has been taken from Cerro Mercado in increasing quantities. It has been worked for three centuries already and in recent years has been supplying the major part of the iron used in Mexico. It is so famous that its picture and history can be found in nearly any standard historical or guide book on Mexico. The estimate is that it alone contains enough iron to supply the world for 300 years more was made by a committee of engineers about fifteen years ago.

And yet in 1920 the Monterrey plant purchased that whole vast store of future world power for 1,000,000 pesos, or \$500,000! That is an indication of how the opportunities in Mexico have been overlooked by the people closest to the brush.

The efforts of the Krupp interests to get into Mexico are significant. They show how quickly after recognition the wide world is turning to Mexico for raw materials, and the realization in other lands than ours of the marvelous resources of that country.

And they show that Staines is not the only German financier who is investing heavily in Mexico and South America.

MILKING TIME  
At one of the big dairies electric fans of a heavy type are being installed for the purpose of keeping the flies off the cows. Incidentally the fans cool the cows and make them most amenable to the milking process. It is also proposed to install a phonograph, as it has been demonstrated that a cow will give more milk when under the influence of soothing harmonies. The cow of the future will not only have electric fans and a Swedish masseur but she will have a symphony orchestra and an embroidered headrest. If she has the proper ration of steamed barley she may furnish malted milk.

The efforts of the Krupp interests to get into Mexico are significant. They show how quickly after recognition the wide world is turning to Mexico for raw materials, and the realization in other lands than ours of the marvelous resources of that country.

And they show that Staines is not the only German financier who is investing heavily in Mexico and South America.

LOVE LETTERS  
Whether a married woman is justified in keeping up an exchange of love letters with former sweethearts is a question now being argued over in the divorce court. The judge is rather inclined to the belief that the lady should chop off most of the correspondence when she becomes a wife. It might be unpleasantly embarrassing for a husband to come upon a bunch of letters mailed to his wife and calling her "Dovie," "Honey," "Toodleskins" and the like, but all penned by perfect strangers to him.

Just Dross in Madge: I notice your aviator friend never stays long when he calls.

Marie: No, naturally he only makes flying visits.—[From the Boston Transcript]

## Watch It Go

That dingy film on teeth  
See the new beauty come

This test has shown millions the way to whiter, cleaner teeth. The results are quick and apparent.

They have led many people of some 50 nations to clean their teeth in this new way. Now you should learn how much it means to you.

### It fights film

Your teeth are coated with a viscous film. You can feel it now. Much of it resists the tooth brush, clings and stays.

Soon that film discolors, then forms dingy coats. That is why teeth become clouded.

Film also holds food substance, which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Germs breed by millions in film. They, with tartar, are the chief cause of your

teeth. That is why tooth troubles are almost universal, with people who do not fight film.

### You can do it now

Dental science has in late years found ways to fight that film. One acts to disintegrate the film at all stages of formation. The other removes it from the harmful sources.

These methods were proved by many careful tests. Then a new-type tooth paste was perfected to apply them daily. The name is Pepsodent.

Now this new method has come into world-wide use. Leading dentists everywhere advise it.

### Teeth feel clean

Pepsodent also multiplies the alkalinity of the saliva, also its

starch digestant. Those are there to neutralize acids and digest starch deposits on teeth. Pepsodent gives them manifold effects.

Thus Pepsodent brings to users more than whiter teeth. It brings multiplied protection. And with out any harmful grit.

Save their teeth

Pepsodent is more important to children than adults. Their teeth are more subject to film attack, and the results often last for life.

Make this test for your sake and your family's sake. See the whiter teeth it brings. Feel the cleaner teeth. Then decide for yourself if those in your home should have these benefits continually.

In one week you will know beyond doubt. Cut out coupon now.

## Los Angeles' Newest Temple of Cinema Art

Playhouse and Author  
Charles Chaplin, who wrote and directed "Woman of Paris," to be given world premiere here, and interior view of Criterion Theater, where it is to be presented at opening.

### CRITERION OPENS TONIGHT

Chaplin's First Film Drama to be Given in Remodeled House of Byzantine Luxuriousness

"A Woman of Paris," the first picture written and directed by Charles Chaplin, will be given its world premiere before a distinguished audience this evening at the opening of the new Criterion Theater, the first downtown motion-picture showplace with the policy of two-a-day presentations and all seats reserved.

The West Coast Theaters, Inc., have transformed the old Kinema Theater at Seventh and Grand into an entirely different playhouse during the past few weeks, and has renamed it the Criterion. Only the walls of the old structure remain, the inside having been rebuilt into one of the most luxurious of Los Angeles theaters.

The style of architecture is Byzantine. So are the decorations and furnishings. The ceiling has been transformed into a great dome of massive squares, brilliantly illuminated. From these squares hang brilliant colored, flashing colors of the rainbow. Rich tapestries adorn the walls, while the stage is framed in flowing colors. The walls of antique stone in colors of gray and silver are enriched with other hues, letting in here and there the mellow shades of sunlight.

COSTLY PLACE  
The tapestries and decorations involved in the furnishing of the Criterion represent an actual outlay of more than \$75,000. The entire lower floor capacity, with the exception of a few rows in front, have been set out in luxurious leather divans.

With the premiere this evening the theater will assume the policy of two shows a day. Beginning tomorrow performances will be given at 2:15 and 8:15 with all seats reserved.

The opening tonight will be attended by one of the most brilliant audiences in Los Angeles. Many of theatricals Friends of Charles Chaplin's have traveled all the way from London and Paris to attend the premiere, while noted exhibitors, famous stars, producers and directors have taken out reservations. With the exception of a few seats, the house is entirely sold out. Tickets went at a premium after the first few days of the opening sale.

CHARPIN TO ATTEND  
Charles Chaplin, who has worked for almost a year on the production of "A Woman of Paris," will attend the opening in person, accompanied by the most important members of his staff. Chaplin himself does not appear in the picture, but he is said to take his place as a director of the motion picture.

The most brilliant gathering of stars and notables which will occupy reserved seats this evening includes: Mary Pickford, Douglas Fairbanks, Mrs. Frances Marion, Thomas H. Ince, Conrad Veidt, Joseph Schmidkraut, Victor Heerman, Miss Constance Talmadge, Miss Elinor Glyn, Mr. and Mrs. Willard Mack, Miss and Mrs. E. T. Hudson, Mrs. Anna May Wong, Mrs. Mary Carr, Mr. and Mrs. Roy Jones, Ben Lyon, Judge and Mrs. W. T. James, Dr. Granville MacGowan, Earle C. ## SPYING CHARGE STIRS COUNCIL

Row Over Graft Accusation Takes New Twist

Mallard's New Shot Brings Retort by Mushet

Keyes Will Study Situation Before Acting

The row in the City Council over the charges of grafting made by Councilman Mallard on Monday broke out in a new place yesterday, formed of personal accusations between Councilmen Mallard and Mushet in which the former accused the latter of spying upon matter left on Mallard's desk.

President Workman, and Councilmen Gregory, Baker, Musket, and John Keyes, were present. Councilman Clegg was absent, and Councilman Wheeler said

it has nothing to do with him and that he purposed to let the others fight out their own battles.

Dist. Atty. Keyes yesterday received a communication signed by six Councilmen requesting an investigation by the county grand jury of the charges of Councilman Mallard that grafting had been paid in connection with the purchase of the city of automobile trucks.

Mr. Keyes said that he has yet had an opportunity to go over the facts and that any action which may be taken will be predicated upon the outcome of such a preliminary inquiry.

Councilman Mallard, who created the furor in the Council chambers Monday, yesterday reiterated his accusation of graft.

MALLARD RETICENT

"I repeat that every time the matter of the purchasing of trucks for the city arises there is something peculiar about it," he said. "I am fully prepared to discuss the charges with the District Attorney, and to go before the grand jury and tell what I know. We have no time now, however, to go into the details of the case."

Mr. Mallard indicated that he did not care to give out further details, but he did say that he had been asked to appear before the six Councilmen, who Monday sent a letter to Keyes asking for an investigation of the charges. The six, said Mallard, were "against him."

Major Cryer appeared thankful that the storm was not raging about his own head. He said he had taken no official action in the affair, and he does not contemplate doing so, as he understood that the investigation would be handled by the District Attorney.

LAST ORDER VETOED

"It strikes me as a coincidence," said the Mayor, "that the same three companies, the General Motors Company, the Moreland and the Standard, are the ones that awarded the sixty truck order last year. I refused to agree that

the bylaws of the association

provide that only those who have had four years of actual flying experience are entitled to membership and that all members abstain from flying with passengers.

All applicants must also pass a physical examination before being admitted to the association.

The organization was founded several weeks ago with sixteen members. Since then more than 100 flyers from all parts of the country have joined.

Gilbert Budwig of the Rogers

Airport has been named president of the association. Capt. C. Turner

of the Glendale Airport and Freda Whiting of the Rogers Air

port are vice-presidents, and Howard Patterson of Clover Field, Santa Monica, is secretary-treasurer.

The association emblem consists of a globe with wings with a shield bearing the letter "P" in the center and will be worn by all members. In this way it is expected to insure the flying public against accident at the hands of unqualified pilots.

According to Capt. Turner, who is well-known here as a skywriter, the majority of airplane accidents can be traced to stunts, low flying or lack of experience.

All the men in the association have agreed to give up stunt flying or to fly at low altitudes, he said.

"In addition to this, none of the members will be permitted to operate a plane that has not been approved by the association.

It is planned to make the organization national in its scope and we have already enlisted practically all of the United States mail flyers. Applications for membership are being accepted from commercial aviators in all parts of the country."

The charter members of the association follow:

Gilbert Budwig, B. Cresth,

Ed. Brown, L. Lovett, Thomas

Maurice Murphy and Freda

Whiting, of Rogers Airport; Howard Patterson, Kenneth Montee, Frank Clark and Frank Tomick, of Clover Field; Capt. C. Turner and E. A. Roselli, Glendale Airport; Eric Spina, a former test pilot for David Douglas, Santa Monica; Earl Doherty and E. P. Boyd of Long Beach, and Art Burns of Avalon.

EXHIBITION  
OF DAHLIAS  
WILL OPEN

Annual Show to  
Many New Varieties  
Tomorrow's Preview

Thousands of cultivated  
including the most recent  
can and English varieties  
presented to flower lovers by  
Dahlia Society of Southern California  
at the society's annual  
beginning tomorrow and continuing  
for three days, in the Home  
Arnold Building at Second and Figueroa Streets.

Many varieties have been  
reported this year, and  
have the opportunity of  
the Americans with  
novelties. Cups, vases,  
other prizes will be awarded  
winners in different classes.

All prominent growers  
Southern have entered  
Part of the space will be  
to an educational exhibit  
all phases of dahlia culture  
revealed. Tubs and tools  
will be a daily feature.

Beginning this year,  
under two classes, amateur  
amateur growers, judges in each class.  
Include John G. Morris, supervisor of parks;  
Patrick superintendence of parks;  
Marino Ranch, San Gabriel; Macmillan Park, Los Angeles; Walidie of El Monte and Foerster of Santa Barbara.  
Judge—Dodge of Arcadia.

An exhibition of  
modes, unusual  
in point of com-  
prehensiveness  
as well as in ex-  
clusiveness and  
beauty.

## TOWN BUILDER RESTING HERE

*Great Southland Possibilities  
Seen by M. T. Streeter*

*Farm Development Urged  
by Colorado Promoter*

*Tells of Pushing Coal Mines  
in Home State*

After building a town, promoting a railroad and, incidentally, tapping a coal deposit estimated to contain 750,000,000 tons, M. T. Streeter of Mt. Stromlo, Colo., thought it would take a little vacation in Los Angeles and he is here now staying at the Stowell Hotel. "I've worked hard all my life," said Mr. Streeter, "much of the time in overalls and hickory shirt, but I never had anything quite so trying as having to wander about all dressed up with no place in particular to go and nothing special to do. I don't think I needed that vacation quite so much as I thought I did."

### MAKE CONNECT HERE

Therefore, it is more than probable that the Colorado promoter, who has made it his business all his life to look for development opportunities, may connect with some enterprise in California before he leaves here. He is getting ready, sitting around.

"Your Southern California certainly offers marvelous chances to the entrepreneur," he says, "between Los Angeles and Arizona there is a big field for the man who wants to go in and help build up the country. Your large areas of fertile, unoccupied lands appeal particularly to me. They may be put up into small farms and, with favorable climatic conditions prevailing here, can be made to produce enough to sustain a vast population. I see great future for Southern California."

Mr. Streeter's account of his experiences in building Mt. Stromlo, the greatest coal deposits in the world are found in the region about Mt. Stromlo," he said. "The coal is semi-anthracite, burns with very little ash or gas and can be shipped any distance without deterioration. But it was more than sixty years from the time the first mine was established that transportation involved not only great construction problems but also antagonism from other roads.

### RANCH IS PURCHASED

A group of New York capitalists had their eye on this coal, however, and they seemed to carry out their plans. The teller story about what is today the town of Mt. Stromlo was occupied by widely scattered ranchers. The miners, however, purchased a ranch of 452 acres, which was situated the largest coal deposit, a veritable mountain of coal.

The man who owned the ranch operated small coal mines in addition to his ranch activities, supplying fuel to the surrounding ranchers, who came many miles.

A gang of men was set to work to bring the coal to the nearest railroad. We have sold thousands of tons of this coal at 75 cents a ton, and a good deal of it has been given away to ranchers in order to

## IT'S A DOG'S LIFE, GENTLEMEN

*Only Two Days Left for Registration*

Hollywood Show Entrants

MIDNIGHT of the 27th inst. is the very last minute for entries in the Hollywood Dog Show, according to Claude Hill, show secretary.

From the number of entries received thus far, Mr. Hill predicts that the local show will again this year be the largest in California and perhaps in the entire West.

More than 150 dogs have been entered from all parts of California and as far east as Colorado.

In the photograph are shown two of the entrants in a dog show. The larger dog is a dachshund and the admittance of the Cairns terrier who is acting as cashier looks like Little Red Riding Hood's wolf.

## MARINES TO COME IN FORCE

*Large Advance Outfit is to Accompany Fleet on Winter Maneuvers*

The largest advance base force of marines that has ever been organized will accompany the United States battle fleet on its maneuvers this winter in the Caribbean Sea, it was learned at the Los Angeles Harbor base yesterday. A program of land attacks by the fleet, in which the huge force of marines will be used with an assault force and for defense ashore, is being included in the maneuver plans now being drawn up on the fleet flagship Seattle under the direction of Admiral Robert E. Coontz.

A complete naval base, supply stations, radio bases and a giant athletic field will be constructed on the shores of Cuba later this fall, it was announced by Admiral Coontz to accommodate the armada of 141 warcraft that will participate in the joint maneuvers out of Vieques Sound.

The division will be ordered from the east coast expeditionary force, will consist of infantry, artillery, engineers and signal corps troops, every arm of the service being represented. The transports Henderson and Sirius will be used exclusively for carrying the marines in the maneuvers area.

**MAN IS SENTENCED**

C. P. Stone yesterday pleaded guilty to a charge of assault with intent to commit a statutory offense against an 8-year-old girl, waived time and was sentenced to serve from one to fourteen years at San Quentin.

**FILES DAMAGE SUIT**

A suit for \$11,000 damages was filed yesterday by W. Dwight Hammond and his wife, Mrs. Pearl Hammond, against Herbert W. Wright for damages sustained in an automobile collision last May. The complainant avers that the collision resulted from negligence on the part of Herbert, and that flying glass permanently scarred Mrs. Hammond's face.

**MAN IS SENTENCED**

C. P. Stone yesterday pleaded guilty to a charge of assault with intent to commit a statutory offense against an 8-year-old girl, waived time and was sentenced to serve from one to fourteen years at San Quentin.

## GRAND JURY GRAFT QUIZ IS RESUMED

*Inquiry Fails to Develop Proof of Charge Against Corporation Office*

The investigation into charges of irregularities in Corporation Commissioner Daugherty's office was resumed by the grand jury yesterday but at the conclusion of the day it was learned that little or nothing had been learned since the charges had been revealed. The investigation, Dep. Dist.-Atty. Stafford stated, is practically at a standstill as far as actual evidence is concerned, although it will be resumed Tuesday.

The inquisitorial body examined six witnesses, whose names had been submitted by Supervisor of Investigations. One witness remained as a witness some days ago. They were N. H. Robotham, Robert M. Grant, Alvaro Pratt, Frank Vessey, Virgil A. Miller, Alice Conine and Sam J. Chappell of the Board of Civil Service Commissioners.

Mr. Staffor, who is in charge of the investigation for the District Attorney's office, stated that the evidence obtained from the witnesses was unimportant and that nothing irregular in the Corporation Commissioner's office had been found.

The investigation grew out of charges made in a letter by Mr. Woodley to Mr. Daugherty. In this letter, the Supervisor stated that it was necessary to pay subordinates in the Corporation Commission a sum of money to permit them to sell stock. Mr. Daugherty made the letter public and demanded that an investigation of the charges be made.

Gentleman Jim was in charge of the investigation for the District Attorney's office, he said. The evidence obtained from the witnesses was unimportant and that nothing irregular in the Corporation Commissioner's office had been found.

The investigation was conducted by Mr. Staffor, who is in charge of the investigation for the District Attorney's office, he said. The evidence obtained from the witnesses was unimportant and that nothing irregular in the Corporation Commissioner's office had been found.

MANHATTAN PALM TREES  
PASS HECTIC EXISTENCEDemand for Stately Tropic Plant  
Increases With Embargo on  
Importation

(EXCLUSIVE DISPATCH)

NEW YORK, Sept. 25.—A tree and a man what has happened to them in the metropolis—that is our tale. Why not parallel the career of a member of the plant kingdom with that of a human being? A tree is a thing of life, and botanists say it can suffer, too. So here goes:

The tree—it died today in a stuffy, dark corner of a Manhattan hotel because a florist's boy forgot to give it the bath and a place in the outdoor air needed to keep open its breathing pores. Yes, trees have breathing pores like human bodies; their trunks and the green foliage are fairly speaking, the lungs of the earth.

The man—he lives and prospers. In fact, from his first job when he was 14 years of age as stoker for three boilers supplying heat to a greenhouse in New York City (at \$1 a week,) he has risen to general manager of a great motion-picture production corporation in twenty-two years' time.

They never knew each other, however, until last evening in New York, when listening to the hotel orchestra that it screened.

And the tree also had passed thirty years, for it was a royal palm, a prince in the plant kingdom, who have watched the vicissitudes of their joint drama—now for the prologue.

**SEED FROM AFAR**

What the rubber plant used to be to the American family the royal palm tree now is to the big hotels of "Byzantium on the Hudson," indoor decoration, scenery and backdrops for the stage, for the grand foyers and ballrooms, and for the short summer season for gardeners. It also served the same purpose in stately houses and sumptuous apartments of the fashionable and well-to-do.

Once these palms came full size from Belgium, France and Holland. No longer. A Federal embargo has stopped the foreign-grown palms. Not even a single palm seed is allowed human aliens can enter. All immigrant palms are excluded.

Today the bulk of the palms of Germany come from the suburbs of Philadelphia, where the firm of Charles D. Heacock, Joseph Heacock and Henry A. Drer. The remaining are shipped in from Florida and California, and sold when they have grown to a height of six feet.

The palms of Manhattan—dare we say like the majority of human inhabitants—form a small part of the palm family which has 122 genera with about 1100 species, with a widespread utility that embraces walking sticks, food, shelter, clothing, timber, fuel, fiber, starch, sugar, oil, wax, wine, tannin, dyeing materials, resin and a host of minor products.

Again in this utility is suggested the producers of America who live away from Broadway.

**WORKED TOO FAST**

As for that man, he started his collection coal to the furnace of a Nebraska greenhouse, he is Sidney R. Kent, whose offices are on Fifth avenue, near Forty-second street. He kept the school for two years, and received another at the New York.

"I am laying up all the time in this city," today said Marshall Clarke, the Upper Broadway florist, whose family have been specializing in palms since 1849. It was he who founded the palm department upon Philadelphia for its supremacy of palms. We then gave him the news of the passing of the old palm in the downtown hotel. He was not surprised.

"He lived here only three weeks," he explained.

"Well, such is palm life," he replied. As a diagnosis of the disease, Frank Hitchcock, former manager-general, launched him in pictures, where at the age of 36 he now is a powerful factor. Mr. Kent himself daily at the hotel of the new millionaire.

"Moral: When the conservation of the forests in the West next enters the mind save a thought for the preservation of potted palms."

Manhattan Island. The poor things!

United States Senate increased its majority vote by five more votes, making it twelve to one in favor of the League of Nations which was ratified by the United States and Woodrow Wilson would have made the President for a term and I believe he is a fool because I do not know the terms in a chemistry book or because he cannot tell the cause of the Peloponnesian War?

I do not seem so to me; yet why do these learned professors force us to study chemistry and John history?

Some one somewhere has made a great mistake. All men were not made in the same mold and it is wicked to force them out of their form. I think the inquisition was not more cruel than this civilization.

May we not believe that had our nation promptly ratified the treaty and joined the League of Nations, universal peace would have immediately reigned on this earth. The world would have been at peace, the markets of the world would have increased, trade and industry would have been revived and vitalized, the expenses of the war would have been paid, health conditions would have been improved and the dollar, our bimetal unit of money so serviceable for 100 years, always so much needed in world commerce and world exchange.

May we not believe that had our nation stayed for one year, the children of God and that of such the Kingdom of Earth and that of such the Kingdom of Heaven, would have been revived and vitalized, the expenses of the war would have been paid, health conditions would have been improved and the dollar, our bimetal unit of money so serviceable for 100 years, always so much needed in world commerce and world exchange.

May we not believe that had our nation stayed for one year, the world would have been more peaceful and more devout than ever before in the history of man. War is the only cause of changing conditions.

I do not seem so to me; yet why do these learned professors force us to study chemistry and John history?

Some one somewhere has made a great mistake. All men were not made in the same mold and it is wicked to force them out of their form. I think the inquisition was not more cruel than this civilization.

May we not believe that had our nation stayed for one year, the world would have been more peaceful and more devout than ever before in the history of man. War is the only cause of changing conditions.

Manhattan Island. The poor things!

United States Senate increased its majority vote by five more votes, making it twelve to one in favor of the League of Nations which was ratified by the United States and Woodrow Wilson would have made the President for a term and I believe he is a fool because I do not know the terms in a chemistry book or because he cannot tell the cause of the Peloponnesian War?
